纱线说明

RIVIERA is a cotton cord yarn which is mercerized to give a luster. The mercerizing process is to eliminates the fluff of the cotton material. It is ideal item for high-class and elegant knit products.

【TECHNICAL RECOMMENDATION】

We recommend knitting with double face stitches like half cardigan or full needles for RIVIERA series.

This item is mercerized with a special solvent. It has a cross-sectional structure that reflects light and gives it a luster.

In the stretching process, some non-uniformity occurs and it causes the stripes or color unevenness with plain stitches (jersey stitches).
